HCT

Proudly Providing Pharmacy
Solutions for Over 30 Years

HCT Products Promote Efficiency and Aseptic Technique

HCT is pleased to have partnered with leading vascular companies that align with our value based model. Please contact us to learn more about how our portfolio is delivering exceptional clinical outcomes and providing cost savings.

Talk to your sales rep about product programs and availability.

Table of Contents

Improves Patient Safety while Reducing Costs and Complications

Natural rubber latex is not used in the manufacturing of these products and tubing sets do not contain DEHP.

Nexus TKO®-6P Anti-Reflux Needless Connector

- Reduce the risk of unintentional blood reflux into your patient's catheter upon syringe connection/disconnection, when the IV bag runs dry, patient movement, etc.
- Reduce the risk of intraluminal thrombotic catheter occlusions
- Reduce the overuse of CathFlo/tPA associated with increased CLABSIs and costs
- Extend catheter dwell time

- No clamping sequence is required; No change in practice
- Up to 7 day use; use as directed in your facility's protocol
- Design facilitates aseptic technique
- Power injectable to 10 mL/second or 325 psi
- Clear, direct, rigid, internal fluid pathway provides easy visual assessment

StatSeal Product Offering

StatSeal hemostatic products are available in both powder and disc (compressed disc) form to meet a wide variety of bleeding control needs.

StatSeal Discs	StatSeal Powder	StatSeal Advanced Powder	StatSeal Advanced Discs
For Indwelling Catheters	For Indwelling Catheters & Procedural Sites	For Large Bore Catheters or Multiple Catheters	For Sheath & Catheter Removals

Ideal For:
Vascual Access
and/or
Interventional Radiology

Ideal For:
Interventional Cardiology
and/or
Interventional Radiology

StatSeal Disc Products

- For temporary external control of bleeding from indwelling catheters
- Disc sizes ranging from Extra Small to Extra Large fit a full range of catheters from ~1 Fr – 18 Fr

Order No.	Disc Size	Center Hole Fits Catheter Sizes:	Qty	Order No.	Disc Size	Center Hole Fits Catheter Sizes:	Qty

MiniLoc® Kits With or Without Y-Site

The MiniLoc™ Safety Infusion Set's low profile and small footprint design make it the ideal needle for dressing the access site. The small size of the needle and the downward angle of the tubing coming off of the back of the device help to maintain dressing integrity.

- Low profile and small footprint enable the site to be easily dressed
- Downward angled tubing to help maintain dressing integrity
- Audible, tactile and visual click to confirm engaged safety mechanism
- Dual lumen port adaptable to enable simultaneous infusions
- Reduces risk of injury and exposure to bloodborne pathogens

Below is a custom peristaltic pump set & single-use system (SUS) that HCT created for a client.
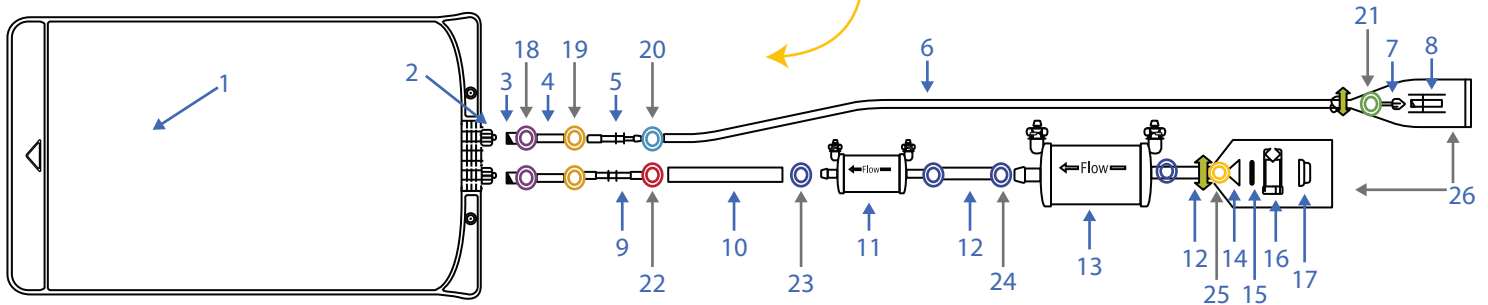

No.	Park Description	Material	Remarks
1	3L EVA BAG	SANDED	30um
2	COEXTRUSION TUBE+MALE LUER	PVC(NON DEHP)&EVA+ABS	ID:6.5MM / OD:8.5MM / LENGTH:3CM LUER:5.0MM
3	FEMALE LUER (X2)	ABS	6.4MM
4	SILICONE TUBE (X2)	SILICONE	ID:6.4MM OD:9.5MM /LENGTH:6.4CM
5	CONNECTOR	PP	7.9MM x 6.4MM
6	SILICONE TUBE	SILICONE	ID:4.8MM OD:8.0MM /LENGTH:110CM
7	MALE LUER	PC	6.4MM
8	H CONNECTOR	ABS	BLUE
9	CONNECTOR	PP	7.9MM x 14.2MM
10	SILICONE TUBE	SILICONE	ID:12.7MM OD:19.05MM /LENGTH:10.16CM
11	CAPSULE FILTER1	707	Filtration area : 570cm2
		(PP housing PES 0.22 Barbed hose ends)	
12	SILICONE TUBE (X2)	SILICONE	ID:6.4MM OD:11.2MM LENGTH:7CM
13	CAPSULE FILTER2	L707	Filtration area: 2041cm2
		(PP housing PES 0.22 Barbed hose ends)	
14	FLANGE	PP	
15	SILICONE GASKET	SILICONE	
16	CLAMP	ABS	
17	END CAP	PP	
18	Metal Clamp (2X)	304	(0010.5-505R) 105
19	Metal Clamp (2X)	304	(0012.3-706R) 123
20-23	Metal Clamp (1X)	304	
24	Metal Clamp (3X)	304	(0015.7-706R) 157
25	Metal Clamp (1X)	304	(0014.2-706R) 142
26	PE BAG WITH TIE (2X)	PE+NYLONE	

Compatible with Brands Like:

- Bausch
- Cole-Parmer
- Flexicon
- Fisherbrand
- & More

Moog CURLIN Ambulatory Infusion Pumps

Advancing the Delivery of Infusion Therapy

For over 20 years, Moog Medical has been designing industry-leading infusion pumps. Our infusion expertise and collaboration with customers and patients benefit healthcare delivery and enhance caregiver and patient outcomes.

CURLIN 6000 CMS Ambulatory Infusion Pump

The 6000 Clinical Management System (CMS) is a truly ambulatory multi-therapy electronic infusion device capable of Continuous, PCA, PCEA, Subcutaneous, TPN, Intermittent, and Variable modes.

Order No.	Description	Qty
360-1400P	Curlin CMS-6000 Pump	1/each
360-1400PE	Curlin CMS-6000 Pump	1/each

CURLIN PainSmart IOD Pain Management Electronic Infusion Pump

The CURLIN PainSmart IOD (Information on Demand) is built on the proven CURLIN 6000 ambulatory infusion platform to bring a unique electronic infusion device designed to safely deliver PCA, PCEA, and Subcutaneous infusions.

| Order No.	Description	Qty
360-1300P	Curlin PainSmart IOD Pump	1/each

CURLIN PainSmart IOD Pain Management Electronic Infusion Pump

The PainSmart IOD (Information on Demand) is a unique electronic infusion device that is capable of delivering PCA, PCEA, and Subcutaneous infusions while improving outcomes and reducing costs. Designed to be used specifically for epidural infusions.

| Order No.	Description	Qty
360-1300E	Curlin Epidural IOD Pump	1/each

Administration Pump Sets For Use with CURLIN Pumps

All administration pump sets are non-DEHP PVC and are not manufactured with rubber latex. They feature integral free-flow protection
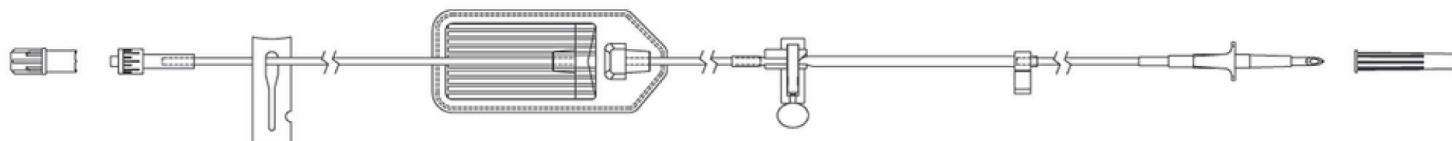

HCTF22-PSMC Shown as Example

**CURLIN Infusion Administration Sets from HCT**

- Administration pump sets are for use with CURLIN pumps.
- Administration pump sets have a non-vented bag spike.
- NOTE: Measurements shown in the administration set descriptions below indicate the total length of the set in meters (and inches), and fill volume in milliliters.

Order No.	CURLIN No.	Description	Size	Qty
HCT-PSMC	340-4114	Straight set with slide clamp, and male luer with vented cap	2.3m/3.4mL	20/CS
HCTBC-PSMC	340-4166	Straight set with slide clamp, anti-siphon valve, and male luer with vented cap	2.3m/3.7mL	20/CS
HCTF12-PSMC	340-4128	With 1.2 micron air-eliminating filter, slide clamp, and male luer with vented cap	2.5m/7.1mL	20/CS
HCTF12BC-PSMC	340-4128V	With 1.2 micron air-eliminating filter, slide clamp, male luer with vented cap, and add-on check valve (V)	2.5m/7.1mL	20/CS
HCTF22-PSMC	340-4130	With 0.2 micron air-eliminating filter, slide clamp, and male luer with vented cap	2.5m/6.8mL	20/CS
HCTF22BC-PSMC	340-4130V	With 0.2 micron aireliminating filter, slide clamp, male luer with vented cap, and add-on check valve (V)	2.5m/6.8mL	20/CS

HCT CURLIN Administration Sets

CURLIN Infusion Administration Tubing Sets

All CURLIN infusion administration sets are non-DEHP PVC, are not manufactured with rubber latex, and feature integral free-flow protection. All administration sets can be used with any CURLIN infusion pump.

CURLIN Infusion Administration Tubing Sets with Non-Vented Bag Spike - Features Male Luer with Vented Cap

BD PosiFlush™ Normal Saline Syringe

- BD PosiFlush™ Prefilled Saline Syringe complies with major PICC manufacturer recommendations for flushing
- Improves clinician efficiency and workflow
- Talk to your sales rep about product consultation, product programs and availability

BD PosiFlush™ Saline Syringes with 10 mL Diameter

Order No.	Description	New NDC #	Qty
306544	3 mL Normal Syringe	08290-3065-44	30/Tray - 480/CS
306545	5 mL Normal Syringe	08290-3065-45	30/Tray - 480/CS
306546	10 mL Normal Syringe, Standard Plunger Rod	08290-3065-46	30/Tray - 480/CS

### BD PosiFlush™ Prefilled Heparin Lock Flush Syringe

Available in two concentrations (10 USP and 100 USP) in 3mL and 5mL syringe sizes and fill volumes to help support your catheter maintenance practice. It may help maintain catheter patency by locking vascular access devices, when used in accordance with your institution access maintenance protocol.

| Order No.	Description	Heparin Solution	Qty
306413	3 mL Syringe 3 mL Heparin Fill	10 USP units/mL	30/Box - 480/CS
306414	5 mL Syringe 5 mL Heparin Fill	10 USP units/mL	30/Box - 480/CS
306423	3 mL Syringe 3 mL Heparin Fill	100 USP units/mL	30/Box - 480/CS
306424	5 mL Syringe 5 mL Heparin Fill	100 USP units/mL	30/Box - 480/CS

Linear Health Services: Orchid SRV

ORCHID™ Safety Release Valve

- Sterile, single patient use connector for needle-free access
- Placed between the existing IV extension set and general IV tubing connection intended to be used for delivery of fluid to/from an IV catheter. Designed to avoid unscheduled IV starts
- Can be used during direct injection, intermittent infusion, and continuous infusion and decreases exposure to sharps injuries

Orchid SRV (Safety Release Valve)

Standard ISO Luer Connection

Engineered to Prevent Reconnection

Non-Metallica Elastomeric Seal

Proprietary Valve Design Encloses Flow Path

Performance Specs

Priming Voume:
0.182 mL

Residual Volume following Separation:
0.058 mL

Flow Path:
In-line proprietary design

Disconnect Tension:
Max 3.25 lbs
